Wyse is the vendor the world’s largest businesses and institutions trust to implement scalable network-centric computing solutions. Wyse hardware, software, and services ensure customer’s desktops are secure, reliable, and agile, preserving capital and increasing productivity.

Wyse® Winterm™ thin clients are a better way to deliver Windows® applications to users throughout your enterprise – especially task-oriented and general office workers. Our broad range of thin-client devices provides security, manageability, affordability, and reliability. They offer greater ease of deployment, administration, and use than any other desktop option.

The Wyse-enhanced Microsoft® Windows CE 5.0 firmware allows the Winterm 3150SE to boot in seconds, switch between a PC-like desktop with a task bar or the standard Simplified Connection Manager GUI, provide enhanced local security, and connect to the most supported peripherals and add-ons than any Windows CE-based thin client.

The AMD Geode™ GX processor in the Winterm 3150SE delivers a high-speed, integrated video chipset that meets stringent European resolution and clinical health care requirements while delivering 1600x1200 resolution. This new mainstay from Wyse features enhanced video performance in a tight, classic legacy I/O form factor.

As with all Winterm thin clients, the Winterm 3150SE comes bundled with Wyse™ Rapport® (Workgroup edition), the enterprise client management tool that leverages the value of your IT infrastructure for maximum ROI.

The Wyse Winterm 3150SE offers the best price and performance in a classic thin client design. Loaded with both legacy and high-speed I/O ports, the Wyse Winterm 3150SE provides excellent utility for a broad range of thin client environments.
