Wyse® Winterm™ desktops are a better way to deliver Windows®-based applications to users throughout your enterprise – especially task oriented and general office workers. Our broad range of thin-client devices provide security, manageability, affordability, and reliability. They offer greater ease of deployment, administration, and use than any other desktop option.

The Winterm 3235LE is a powerful terminal, based on Windows CE.NET, for those who need both the manageability of a centralized server environment and the power of web-based application access from the desktop. With a built-in Internet Explorer browser, the Winterm 3235LE can be used alone as a browser terminal or with popular thin-client solutions like Windows® 2000, Windows NT® 4.0, Windows 2003 Terminal Server Edition, and Citrix® MetaFrame®. Like all Winterm thin clients, the Winterm 3235LE is secure, managed, affordable, and reliable—all attributes that are valued by IT and line-of-business managers.

The Winterm 3235LE has a tiny footprint, an attractive design, and simple mounting options. It comes with fully integrated 16-bit stereo sound capability, 10/100Base-T network support, optimized I/O with four USB ports, and supports multiple sessions. The Winterm 3235LE enjoys enhanced performance with a faster bus speed than other Winterm 3000 Series products.

Plus, as with all Winterm thin clients, the Winterm 3235LE comes bundled with Wyse™ Rapport®, the enterprise client management tool that leverages the value of your IT infrastructure for maximum ROI.
Specifications

Windows-Based Terminal
- Based on Windows CE .NET operating system
- Integrated Microsoft RDP and Citrix ICA protocols and terminal personalities standard
- Available in 32MB Flash/64MB RAM
